Description of bird: Size, colors, all field marks OBSERVED. - Unique features of this individual, if any.

light gray body with prominent black and white stern
rusty head with buff top
light brown throat

obvious differences because of many A. wigeons close by

Field marks which were not seen. Why not?

wing pattern as bird was only seen swimming

Variations from expected field marks.

none

List similar species and describe why or how you eliminated them.

The only similar species I know of would be the A. wigon because of the many individuals present with this one it was very easy to compare both with each other and the field guide. The head pattern is quite distinct

Behavior of this bird. Other species seen with this one. Any interaction between birds?

seen feeding with wigons and other ducks on pond

Habitat at this location. Adjacent or near by habitat, if significant.

golf course pond

Describe bird's song or sounds.

none

Print reporter's name, address, phone number.

Tim Helentjaris
1721 S. - 500 E.
SLC, Utah 84105

Signature Tim Helentjaris

What is your experience with this or similar birds?

I have often seen A. wigons but never another E. wigon

Corroborating observers not reporting separately.
