## WESTON SMITH RESIDENCE

## CROYDON, UTAH

Picture from 2008

Weston and Louize Smith started building and documenting the birds in their yard in 2003 (many are listed as 2010 because that's when Weston started using ebird.) Our property is approximately two acres and

5,500 to 5,600 feet in elevation from the lowest to highest points. Several of the trees were planted that same year and watered by buckets to begin with. As we have worked to landscape our yard, we have tried to balance our children, animals and both bird and birder. It is an ever-developing project. We hope you enjoy your time here.

Note: The birds listed in *italics* have nested in yard, ones in **bold** are ones you are most likely to see during your time here although they are birds so we can make no promises or guarantees.
